INDEX TO VOLUME XVI.

SUBJECTS.

PAGE

ABSORPTION Band, Observations on Magnetic Rotation of Plane of Polarization in Interior of an. *P. Zeeman* - - - - 106

ABSORPTIVE Power of the Solar Atmosphere. *Frank W. Very* - 73

ACCURACY of Measurement in Use of Telescope and Spectroscope, On Optical Conditions Required to Secure Maximum. *F. L. O. Wadsworth* - - - - - - - - - - - 267

ARC Spectra, Nitrogen Bands *vs.* "New Heads to Cyanogen Bands" in. *Percival Lewis* and *A. S. King* - - - - - 162

Of the Metals, Researches on. VI: Molybdenum. *B. Hasselberg* - - - - - - - - - - - - 300

Spectrum with Heavy Currents. *W. B. Huff* - - - - 27

ATMOSPHERE, Absorptive Power of the Solar. *Frank W. Very* - 73

On the Solar. *Arthur Schuster* - - - - - - - 320

AURORA, Observations of, Made at the Yerkes Observatory, 1897–1902. *E. E. Barnard* - - - - - - - - - 135

BAND, Observations on Magnetic Rotation of Plane of Polarization in Interior of an Absorption. *P. Zeeman* - - - - - 106

BANDS, Nitrogen, *vs.* "New Heads to Cyanogen Bands" in Arc Spectra. *Percival Lewis* and *A. S. King* - - - - - 162

BELL, LOUIS, A Reply to the Recent Article by. *A. Perot* and *C. Fabry* - - - - - - - - - - - - 36

BIGELOW'S "Eclipse Meteorology," Remarks on. *Egon von Oppolzer* - - - - - - - - - - - - 334

CÆSIUM, Potassium, and Rubidium, and Their Mutual Relations, Spectra of. *Hugh Ramage* - - - - - - - - - 43

CAMERAS in Eclipse Work, Note on Focusing Prismatic and Grating. *W. H. Julius* - - - - - - - - - - 181

CARBON, Thermal Development of Spark Spectrum of. *Henry Crew* and *John C. Baker* - - - - - - - - - 61

CATHODO-LUMINESCENT Metallic Vapors, Spectra of. *Percival Lewis* - - - - - - - - - - - - - 31

CAUSES of the Deviations from Newton's Law of Gravitation, Physical. *Peter Lebedew* - - - - - - - - - 155

COMET Photography with the Two-Foot Reflector. *G. W. Ritchey* 178

CONCAVE Grating, Note on. *H. C. Plummer* - - - - - - 97

PAGE

Coöperation in Observing Radial Velocities of Selected Stars. *Edwin B. Frost* - - - - - - - - - - - - 169

Crossley Reflector, The Mirror of.—A Correction. *W. W. Campbell* - - - - - - - - - - - - - 121

Currents, Arc Spectrum with Heavy. *W. B. Huff* - - - - 27

"Cyanogen Bands, New Heads to," in Arc Spectra, Nitrogen Bands *vs. Percival Lewis* and *A. S. King* - - - - - - - 162

Description of A New Type of Focal Plane Spectroscope and its Application to Astronomical Spectroscopy. *F. L. O. Wadsworth* - - - - - - - - - - - - - - 12

Deviations from Newton's Law of Gravitation, Physical Causes of. *Peter Lebedew* - - - - - - - - - - - - 155

Eclipse in Sumatra, of May 18, 1901, Obtained with Photoheliograph, at Fort De Kock, Some Results of the Total. *G. H. Peters* - - - - - - - - - - - - - - 92

Work, Note on Focusing Prismatic and Grating Cameras in. *W. H. Julius* - - - - - - - - - - - - 181

Note on Reflectors for. *W. J. Humphreys* - - - 341

"Eclipse Meteorology," Remarks on Bigelow's. *Egon von Oppolzer* 334

Field, On Radiation of Mercury in Magnetic. *C. Runge* and *F. Paschen* - - - - - - - - - - - - - 118

Separation of Corresponding Series Lines in the Magnetic. *C. Runge* and *F. Paschen* - - - - - - - - - - - 123

Focal Plane Spectroscope, Description of New Type of. *F. L. O. Wadsworth* - - - - - - - - - - - - - 12

Focus for *Nova Persei*, On the Change in the. *E. E. Barnard.* - 183

Gaseous Nebulæ, Determination of Intensity-Ratios of Principal Lines in Spectra of Several. *J. Scheiner* and *J. Wilsing* - 234

ζ *Geminorum*, Observations on. *F. P. McDermott, Jr.* - - - - 117

Grating, Note on Concave. *H. C. Plummer* - - - - - - 97

Cameras in Eclipse Work, Note on Focusing Prismatic and. *W. H. Julius* - - - - - - - - - - - - - 181

Gravitation, Physical Causes of the Deviations from Newton's Law of. *Peter Lebedew* - - - - - - - - - - - 155

Harvard Photographs of *Nova Persei*. Comments on Early. *E. E. Barnard* - - - - - - - - - - - - - - 340

Hydrogen, Wave-Lengths of Certain Lines of Second Spectrum of. *Edwin B. Frost* - - - - - - - - - - - 100

Intensity-Ratios of Principal Lines in Spectra of Several Gaseous Nebulæ, Determination of. *J. Scheiner* and *J. Wilsing* - 234

Light of All the Stars. Total. *Gavin J. Burns* - - - - - 166

Line of Sight, Six Stars Whose Velocities in the, are Variable. *W. W. Campbell* - - - - - - - - - - - - - 114

PAGE

LINES in Spectra of Several Gaseous Nebulæ, Determinations of Intensity-Ratios of Principal. *J. Scheiner* and *J. Wilsing* - - 234
In the Magnetic Field, Separation of Corresponding Series. *C. Runge* and *F. Paschen* - - - - - - - - - - 123
On Prolongation of Spectral. *Theodore Lyman* - - - 328
Wave-Lengths of Certain Oxygen. *Edwin B. Frost* and *Walter S. Adams* - - - - - - - - - - - 119
MAGNESIUM Line at λ4481, Note on the Wave-Length of. *Henry Crew* 246
MAGNETIC Field, On Radiation of Mercury in. *C. Runge* and *F. Paschen* - - - - - - - - - - - - 118
Separation of Corresponding Series Lines in the. *C. Runge* and *F. Paschen* - - - - - - - - - - - - 123
MAGNETIC Rotation of Plane of Polarization in Interior of an Absorption Band, Observations on. *P. Zeeman* - - - - - 106
MAGNETISM, Minimum Sun-Spots and Terrestial. *A. L. Cortie* - 203
MEASUREMENT of Spectrograms, New Objective Method for. *Karl Kostersitz* - - - - - - - - - - - - 262
MERCURY in the Magnetic Field, On Radiation of. *C. Runge* and *F. Paschen* - - - - - - - - - - - - 118
METALLOIDS, Effect of Self-Induction upon Spark-Spectra of. *H. Crew* - - - - - - - - - - - - - 59
METALS, Researches on Arc-Spectra of. VI: Molybdenum. *B. Hasselberg* - - - - - - - - - - - - 300
METEOROLOGY, Remarks on Bigelow's Eclipse. *Egon von Oppolzer* 334
MIRROR of the Crossley Reflector. A Correction. *W. W. Campbell* 121
MISCELLANEOUS Results. *E. C. Pickering* - - - - - - 336
MOLYBDENUM. Researches on Arc-Spectra of Metals. VI: *B. Hasselberg* - - - - - - - - - - - - 121
NEBULA surrounding *Nova Persei*. Note on the. *Louis Bell* - - 38
Movements in. *Arthur R. Hinks* - - - - - - 198
Photographs and Measures of. *C. D. Perrine* - - - - 249
NEBULÆ in the Vicinity of *Nova Persei*. *H. Seeliger* - - - 187
Determination of Intensity-Ratios of Principal Lines in Spectra of Several Gaseous. *J. Scheiner* and *J. Wilsing* - - - 234
NEBULAR Lines, Determination of Wave-Lengths of the Brighter. *W. H. Wright* - - - - - - - - - - - - 53
NEBULOSITY about *Nova Persei* for Polarization Effects, Observations of. *C. D. Perrine* - - - - - - - - - - 257
NITROGEN Bands *vs.* "New Heads to Cyanogen Bands" in Arc-Spectra. *Percival Lewis* and *A. S. King* - - - - - - 162
Nova Persei, Note on the Nebula Surrounding. *Louis Bell* - 38
Comment on Early Harvard Photographs of. *E. E. Barnard* -
For Polarization Effects, Observations of Nebulosity about. *C. D. Perrine* - - - - - - - - - - 257

PAGE

Movements in Nebula Surrounding. *Arthur R. Hinks* - - 198
Nebulæ in the Vicinity of. *H. Seeliger* - - - - - - 187
On the Change in the Focus for. *E. E. Barnard* - - - 183
Photographs and Measures of Nebula Surrounding. *C. D. Perrine* - - - - - - - - - - - - - - 249
OBJECTIVE Method for Measurement of Spectrograms. *Karl Kostersitz* - - - - - - - - - - - - - - 262
OCULAR Spectroscope, Theory of the. *F. L. O. Wadsworth* - - 1
OPTICAL Conditions Required to Secure Maximum Accuracy of Measurement in Use of Telescope and Spectroscope. *F. L. O. Wadsworth* - - - - - - - - - - - 267
OXYGEN Lines, Wave-Lengths of Certain. *Edwin B. Frost* and *Walter S. Adams* - - - - - - - - - - - 119
Persei, Comment on Early Harvard Photographs of *Nova*. *E. E. Barnard* - - - - - - - - - - - - - 340
Movements in the Nebula Surrounding *Nova*. *Arthur R. Hinks* 198
Nebulæ in the Vicinity of *Nova*. *H. Seeliger* - - - - - 187
Observations of Nebulosity about *Nova*, for Polarization Effects. *C. D. Perrine* - - - - - - - - - - - 257
On the Change in the Focus for *Nova*. *E. E. Barnard* - - 183
Note on the Nebula Surrrounding *Nova*. *Louis Bell* - - 38
Photographs and Measures of Nebula Surrounding *Nova*. *C. D. Perrine* - - - - - - - - - - - - - 249
PHOTOGRAPHIC Plate, Number of Stars on. *Egon von Oppolzer* - 332
PHOTOGRAPHS and Measures of the Nebula Surrounding *Nova Persei*. *C. D. Perrine* - - - - - - - - - - - - - 249
Of *Nova Persei*, Comment on Early Harvard. *E. E. Barnard*
PHOTOGRAPHY, Comet, with the Two-Foot Reflector. *G. W. Ritchey* 178
PHOTOHELIOGRAPH, at Fort De Kock, Some Results of the Total Eclipse in Sumatra, May 18, 1901, Obtained with the. *G. H. Peters* - - - - - - - - - - - - - - 92
PHOTOMETRIC Adjustments, Notes on, Spectro-. *L. B. Tuckerman* - 145
POLARIZATION Effects, Observations of the Nebulosity about *Nova Persei* for. *C. D. Perrine* - - - - - - - - - 257
In Interior of an Absorption Band, Observations on Magnetic Rotation of Plane of. *P. Zeeman* - - - - - - - - 106
POTASSIUM, Rubidium, and Cæsium, and their Mutual Relations, Spectra of. *Hugh Ramage* - - - - - - - - - - 43
POWER of the Solar Atmosphere, The Absorptive. *Frank W. Very* 73
PRISMATIC and Grating Cameras in Eclipse Work, Note on Focusing. *W. H. Julius* - - - - - - - - - - - - - 181
PROLONGATION of Spectral Lines. *Theodore Lyman* - - - - 328
RADIAL Velocities of Selected Stars, Coöperation in Observing. *Edwin B. Frost* - - - - - - - - - - - - 169

PAGE

RADIATION of Mercury in the Magnetic Field, On the. *C. Runge* and *F. Paschen* - - - - - - - - - - - 118
REFLECTOR — A Correction, The Mirror of the Crossley. *W. W. Campbell* - - - - - - - - - - - - 121
Comet Photography with the Two-Foot. *G. W. Ritchey* - - 178
REFLECTORS for Eclipse Work. *W. J. Humphreys* - - - 341
REPLY to the Recent Article by Louis Bell. *A. Perot* and *C. Fabry* 36
RESULTS, Miscellaneous. *E. C. Pickering* - - - - - - 336
ROTATION of Plane of Polarization in Interior of an Absorption Band, Observations on Magnetic. *P. Zeeman* - - - - - - 106
RUBIDIUM, Cæsium, and Potassium, and their Mutual Relations, Spectra of. *Hugh Ramage* - - - - - - - - - 43
SELF-INDUCTION upon Spark-Spectra of Metalloids, Effect of. *H. Crew* - - - - - - - - - - - - - 59
SEPARATION of Corresponding Series Lines in the Magnetic Field. *C. Runge* and *F. Paschen* - - - - - - - - - 123
SERIES Lines in the Magnetic Field, Separation of Corresponding. *C. Runge* and *F. Paschen* - - - - - - - - - 123
SOLAR Atmosphere, Absorptive Power of the. *Frank W. Very* - 73
On the. *Arthur Schuster* - - - - - - - - - 320
Research at Yerkes Observatory. *George E. Hale* - - - 211
SPARK-SPECTRA of Metalloids, Effect of Self-Induction upon. *H. Crew* - - - - - - - - - - - - - - 59
SPARK-SPECTRUM of Carbon, Thermal Development of. *Henry Crew* and *John C. Baker* - - - - - - - - - - - 61
SPECTRA, Nitrogen Bands *vs.* "New Heads to Cyanogen Bands" in Arc. *Percival Lewis* and *A. S. King* - - - - - - 162
Of Cathodo-Luminescent Metallic Vapors. *Percival Lewis* - 31
Of Metalloids, Effect of Self-Induction upon Spark-. *Henry Crew* 59
Of Potassium, Rubidium, and Cæsium, and their Mutual Relations. *Hugh Ramage* - - - - - - - - - - 43
Of Several Gaseous Nebulæ, Determination of Intensity-Ratios of Principal Lines in. *J. Scheiner* and *J. Wilsing* - - 234
Of the Metals, Researches on Arc. VI: Molybdenum. *B. Hasselberg* - - - - - - - - - - - - - 300
SPECTRAL Lines, On Prolongation of. *Theodore Lyman* . - - 328
SPECTROGRAMS, On New Objective Method for Measurement of. *Karl Kostersitz* - - - - - - - - - - - - - 262
SPECTRO-PHOTOMETRIC Adjustments, Notes on. *L. B. Tuckerman* 145
SPECTROSCOPE and its Application to Astronomical Spectroscopy, Description of New Type of Focal Plane. *F. L. O. Wadsworth* 12
And Telescope, Optical Conditions Required to Secure Maximum Accuracy of Measurement in Use of. *F. L. O. Wadsworth* - 267
Theory of the Ocular. *F. L. O. Wadsworth* - - - - - 1

PAGE

SPECTRUM of Carbon, Thermal Development of the Spark. *Henry Crew* and *John C. Baker* - - - - - - - - - 61
Of Hydrogen, Wave-Lengths of Certain Lines of Second. *Edwin B. Frost* - - - - - - - - - - - 100
With Heavy Currents, Arc. *W. B. Huff* - - - - - - 27
STARS, Total Light of All the. *Gavin J. Burns* - - - - - 166
Upon a Photographic Plate, Number of. *Egon von Oppolzer* - 332
Whose Velocities in Line of Sight are Variable, Six. *W. W. Campbell* - - - - - - - - - - - - 114
SUMATRA, Some Results of Total Eclipse in, May 18, 1901, Obtained with the Photoheliograph, at Fort De Kock. *G. H. Peters* - 92
SUN-SPOTS and Terrestrial Magnetism, Minimum. *A. L. Cortie* - 203
TELESCOPE and Spectroscope, Optical Conditions Required to Secure Maximum Accuracy of Measurement in use of. *F. L. O. Wadsworth* - - - - - - - - - - - - 267
THEORY of the Ocular Spectroscope. *F. L. O. Wadsworth* - - 1
THERMAL Development of the Spark-Spectrum of Carbon. *Henry Crew* and *John C. Baker* - - - - - - - - - 61
VAPORS, Spectra of Cathodo-Luminescent Metallic. *Percival Lewis* 31
VELOCITIES in the Line of Sight are Variable, Six Stars Whose. *W. W. Campbell* - - - - - - - - - - - . 114
Of Selected Stars, Coöperation in Observing Radial. *Edwin B. Frost* - - - - - - - - - - - - - 169
WAVE-LENGTH of the Magnesium Line at λ 4481, Note on the. *Henry Crew* - - - - - - - - - - - 246
WAVE-LENGTHS of Certain Lines of Second Spectrum of Hydrogen. *Edwin B. Frost* - - - - - - - - - - - 100
Of Certain Oxygen Lines. *Edwin B. Frost* and *Walter S. Adams* 119
Of the Brighter Nebular Lines, Determination of. *W. H. Wright* 53
YERKES Observatory, Observations of Aurora Made at, 1897–1902. *E. E Barnard* - - - - - - - - - - - 135
Solar Research at the. *George E. Hale* - - - - - - 211

INDEX TO VOLUME XVI.

AUTHORS.
